Internal Auditing

Texas Quality Assurance's team of certified Lead Auditors are here to partner with you for your QMS, EMS, OHS, or Oil & Gas QA Audit.

The practice of outsourcing some or all of the internal audit function to an independent organization affords an organization numerous benefits over maintaining an employee-only internal audit function. Some of these benefits include:

- Objectivity – no more worrying about “not auditing your own work”
- Expert Knowledge – it’s our full time job to know the standards and how to help you work within them
- Lower Business Impact – Our auditors can conduct your audit in a fraction of the time with greater efficiency than a traditional self-audit
- Lower Employment Costs – second party internal audits remove the need to hire and staff lead auditors, leave it to the experts at TQA

Save on travel expenses, ask us about remote auditing options.

Get Certified

Ready to get certified, but not sure where to turn? We have great relationships with several Certification Bodies and are happy to offer an unbiased advice on where to turn and what to do. Contact us to find out more.
